Rows per page 50 Page 1

Tracing interface for a Langfuse project. The left sidebar shows navigation options like Home, Dashboards, Observability, Tracing, Sessions, Users, Monitors, Prompt Management, Prompts, Playground, Evaluation, Scores, and Evaluators. The main area displays a search bar and filters for Environment (default), Type (SPAN, GENERATION), and Is Root Observation (True, False). A table of traces is shown, with columns for Start Time and Type. The right panel shows the details of a specific trace (hybrid-search) with input and output data.

Search: `level:ERROR, -env:dev, latency:>2, scores.accuracy:>0.8`

Filters:

- Environment: **default** (7)
- Type: **SPAN** (6), **GENERATION** (1)
- Is Root Observation: **True** (2), **False** (5)

Groq AI Reranking:

The screenshot shows a web application titled "RAG Pipeline" with a sidebar on the left containing navigation links: "Embeddings & Store", "Query Preprocessing", "Vector Search", "BM25 Search", "Hybrid Search", "Score Fusion" (highlighted), "Summarize & Dedup", "Prompt & Schema", and "Settings". The main content area is titled "Groq AI Reranking Search" and includes a search bar with the query "Share Diagnostic Reports with Patients via WhatsApp". Below the search bar, it shows "Top-K Cuts" set to 50 and "Final Limit" set to 10. A "SEARCH" button is present. The results section, titled "After Groq AI Reranking (10 results)", shows a single result: "#1 TC_2736" with a "Rerank Score: 0.9500" and "Was #1". The result is labeled "AHCSummary -> AHCSummary -> Diagnostic & Imaging report" with "Module: AHC" and "Risk: Low".

The screenshot shows a VS Code editor with a chat window titled "Extend Langfuse tracing to BM25 and hybr..." and a terminal window. The chat window contains a message asking for confirmation to implement Langfuse tracing for Score Fusion, Summarize & Dedup, Prompt & Schema, and Hybrid Search. The terminal window shows the output of a search query: "Query: 'Share Diagnostic Reports with Patients via WhatsApp'", "Limit: 10", "Filters: {}", "Fetching candidates from BM25 and Vector search...", "Retrieved 93 candidates for Groq reranking", "Sending 93 candidates to Groq for semantic reranking...", "Groq reranking complete in 925ms", and "Langfuse trace flushed: 579dbdc8-12da-42ef-9328-4dcdfdd20468".

Tracing interface showing a list of traces. The table displays columns: Start Time, Type, Name, Trace Name, and Input. The traces are filtered by environment (default) and type (SPAN, GENERATION). The cost is set to max.

Start Time	Type	Name	Trace Name	Input
2026-07-28 16:32:30	groq-rerank	groq-rerank-search	groq-rerank-search	{ "query": "Share Diagnostic Reports with Patients via W...

2026-07-28 16:15:02	fusion	hybrid-search	hybrid-search	{ "bm25Weight": 0.5, "vectorWeight": 0.5, "bm25ResultCo...

Tracing interface showing a detailed view of a specific trace. The trace is titled "groq-rerank-search: 579dbdc8-12da-42ef-9328-4dcdff..." and is filtered by environment (default) and type (SPAN, GENERATION). The cost is set to max.

The trace details show the following steps:

- groq-rerank-search (4.57s)
- generate-embedding (0.65s)
- bm25-search (0.13s)
- vector-search (0.36s)
- merge-candidates (0.01s)
- groq-rerank (0.92s)

The input and output are displayed in a table format:

50 hybrid search results

EXPORT CSV

10-Step Pipeline Completed

- ✓ User Story Input
- ✓ Query Preprocessing (Normalize → Abbreviations → Synonyms)
- ✓ Hybrid Search – Test Cases (BM25 + Vector, weighted fusion)
- ✓ Hybrid Search – User Stories (BM25 + Vector)
- ✓ RRF Re-Ranking (Cross-encoder, top 10 selected)
- ✓ Deduplication (Cosine > 0.95)
- ✓ Summarization (TestLeaf API)
- ✓ Prompt Template + Context (ICEPOT framework)
- ✓ LLM Generation (TestLeaf API)
- ✓ JSON Validation (AJV)
- ✓ HTML Conversion (UI rendering)

Query Preprocessing: Applied transformations including synonym expansion, abbreviation handling, and healthcare domain optimization.
